1337 Hexor

General Instructions

- Use Visual Studio
- Check you solution before handing it in
- Adhere to conventions

1337 Hexor

Write a program which reads an `int` from the user, and prints a hex-dump of the number, that is, print the hex value of each byte in the `int`, separated by spaces. Try inputting different values and look at the output of your program. Can you see anything strange? Add a comment to your code with what you see.
